

The Society of Marine Surveyors, Inc.

On March 27th 2008 FA-ST Ltd gave a presentation to a group of over 40 Accredited Marine Surveyors and several members of the RNLI from the UK and Europe at the Corinthians Boat Club in London. The presentation was aimed at pro-active and preventative maintenance by using Oil Sampling & Analysis as a work tool. Topics included:

- What is Oil Analysis?
- What does it tell you?
- Why we should do it?
- What are the benefits to the Marine industry?
- What are the benefits to brokers, buyers and sellers?

A 15 minute power point presentation about Oil Analysis covered the history, laboratory equipment, oil analysis reporting, software and oil sampling techniques. Oil sampling products were made available for view and a handout included sample reports, oil analysis tests, and other relevant information. An open question session followed the presentation.

FA-ST Ltd are available to provide presentations and training to management & employees of all types of companies in all industries regarding Oil Sampling & Analysis.
