- By-pass filters
- Storage tank testing
- Pumps & motors
- Insurance & warranty
- Marine surveyors
- Boat builders
- Shipyards
- Ports & Marinas
- Free quotes
- Discounts available

FA-ST Filtration Analysis Services Technology serving marine industries worldwide.

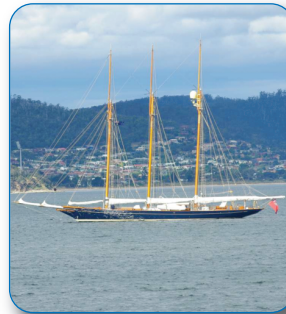

FA-ST Ltd established the Oilcheck analysis service in 2004 and have continually invested in new equipment and extended the range of services offered which can assist individual boat owners, operators of shipping fleets and marine companies to reduce maintenance and services costs and protect machinery investments.

Our Oil Analysis Laboratory operates to [ISO 9001:2008 standards](#) and meets all manufacturer warranty requirements. The Laboratory can provide analysis for all types of synthetic, mineral & bio-degradable oils, engine oils, gas engine oils, hydraulic oils, transmission oils, gear oils, transformer oils, coolants, grease, cutting fluids, water based oils, glycols emulsions, diesel fuel, bunker fuel and biodiesel etc.

Sampling kits for Engineers and owners/operators are competitively priced and include everything needed to aid sampling. We can offer discounts based on volume.

Oil Filtration

Additional services available include oil filtration rigs for hire or purchase, custom built to suit company requirements, by-pass filters for engines and hydraulics, water and particulate removal filters, pumps and motors, tank integrity testing, fuel and oil cleaning services and oil spill equipment.
